EXPERIENCE

Accenture Federal Services, Full Stack Web Developer

Mar 2021 - Current

Consultant, Dec 2022 - Current

Senior Analyst, Mar 2021- Nov 2022

- Lead developer in a multi-year complete redesign and upgrade of an existing application into a new platform. Using Java, Angular 15, Azure SQL.
- Involved in SQL data migration for an application re-platform effort.
- Participate in discussion with different Product Owners on new functionality integration.
- Writing Jasmine and Junit tests to meet a minimum of 80% test coverage for Front and Backend testing.
- Writing and reviewing official documentation for applications. Examples are Database Dictionary, Release build documents, and repository readmes.
- Expanded a shared API application to allow other application to have access to additional endpoint datasets.
- Updated exemplar code repository templates for future applications as a base reference.
- Assist other developers in troubleshooting and debugging.
- Tasked as one of a few developers to review incoming code pull requests for application code changes.
- Keep the team and myself on task, while also allowing other developers an opportunity to grow.

Revature, Full Stack Web Developer

Nov 2018 - Mar 2021

Software Engineer, Nov 2019 – Mar 2021

- Developer on multiple different applications that used different languages: Used Java, C# with frameworks: Angular JS/5, and Webforms.
- Participated in different application releases to address bugs and implement features.
- Worked in both Kanban and Scrum development to address bugs and implement new features.
- Involved in testing functionality to ensure quality. Both manually and via unit tests.
